

JAN DRANREB R. BALANGUE

Software Developer

jandranrebbalangue@gmail.com

Email

09366482101

Mobile no.

SKILLS

Responsive Web Design (HTML5, CSS3)

JavaScript (ES, React, TypeScript, Next.js)

Backend (REST APIs, Node.js, Fastify, Express, BullMQ, Cron Jobs)

DevOps (Docker, Docker Compose, CI/CD, GitHub Actions, GHCR)

Database (MongoDB, PostgreSQL, Supabase)

Version Control (Git, GitHub, Bitbucket)

Linux

WORK EXPERIENCE

- **Allied Marketing** - Full Stack Developer (March 2023 - Present)
 - Owned end-to-end project delivery and server operations, including installation, configuration, and deployment.
 - Converted designs into responsive email templates compatible with devices and email clients.
 - Developed in-house tools to streamline workflows and automate repetitive tasks.
 - Designed and implemented Bitbucket CI/CD pipelines for automated deployments.
 - Built a UI-based, API-driven email warm-up tool with scheduling, mail-class selection, and recipient management.
- **PMHOA Pro** - Software Developer (November 2024 - September 2026)
 - Designed and developed an internal production CRM, defining its initial architecture and selecting Next.js and PostgreSQL as the core stack.
 - Migrated the production PostgreSQL database and maintained database connectivity and production stability.
 - Improved CI/CD and deployment workflows using GitHub Actions, Docker, and GHCR.
 - Moved builds from the production server to GitHub Actions, improving deployment reliability and reducing server resource usage.
 - Maintained email campaign operations and troubleshoot sending issues to keep campaigns running reliably.
 - Troubleshoot production issues and maintained the application and deployment process.
- **Digiteer** - Software Developer (September 2021 - December 2022)
 - Developed, maintained, and enhanced full stack applications alongside the CTO.
 - Managed and monitored AWS cloud services.
- **Splashéo** - Software Developer (March 2021 - August 2021)
 - Developed a REST API for video thumbnails, optimized for performance and security, and integrated it with other services.

PROJECTS

- **Internal Production CRM - PMHOA Pro**

Next.js, PostgreSQL, GitHub Actions, Docker, GHCR

- Designed and developed an internal production CRM from initial project setup, selecting its technology stack and defining its application architecture. Continued supporting the system through PostgreSQL migration, CI/CD improvements, production deployments, troubleshooting, and ongoing maintenance.

Private internal system - source code and live access are not publicly available.

- **Email Warm-Up Automation** - Email Deliverability Tool

(March 2023 - Present)

- Developed a UI-based, API-driven tool to replace manual email warm-up scripts. Implemented scheduling, mail-class selection, and recipient management to gradually increase volume and strengthen sender reputation.

- **Splasheo Media Platform** - Online Audio and Video Media

(March 2021 - August 2021)

- Developed an API for video thumbnail generation and integrated APIs for publishing videos on social media platforms.

EDUCATION

- **Christ the King College** - BS in Information Technology (2015 - 2020)
